

Current performance may be higher or lower than that quoted. Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. See the end of the document for definitions.

Hypothetical Growth of \$10,000

As Of 01/31/2024

A hypothetical \$10,000 investment made in the fund ten years ago, or on commencement of operations for funds lacking a ten-year track record. Figures show monthly returns and include reinvestment of dividends and capital gains but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

Performance

FUND INCEPTION 06/07/2016 YEAR-TO-DATE RETURN AT NAV: -0.84% As Of 02/01/2024

Average Annual Total Returns		1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Month-end As of 01/31/2024	NAV	+4.64%	+0.96%	+5.28%	na	+5.68%
Quarter-end As of 12/31/2023	NAV	+15.51%	+1.61%	+7.20%	na	+6.00%

MORNINGSTAR Data provided by Morningstar, Inc.

Investment Objective

Seeks to provide investment results that correspond to the total return of foreign developed and emerging stock markets.

Strategy

Normally investing at least 80% of assets in securities included in the MSCI ACWI (All Country World Index) ex USA Investable Market Index and in depository receipts representing securities included in the index. The MSCI ACWI (All Country World Index) ex USA Investable Market Index is a market capitalization-weighted index designed to measure the investable equity market performance for global investors of large, mid, and small-cap stocks in developed and emerging markets, excluding the U.S. Using statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, earnings growth, country weightings, and the effect of foreign taxes to attempt to replicate the returns of the MSCI ACWI (All Country World Index) ex USA Investable Market Index. Lending securities to earn income for the fund.

Risk

Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Fund and index performance may vary somewhat due to factors such as transaction costs, sample selection, and timing differences associated with index additions and deletions.

Holdings	
Total # of Holdings as of 12/31/2023	5069

Important Performance and Policy Information

Initial offering of the **Fidelity Limited Term Bond Fund** Retail Class took place on November 1, 2013. Returns prior to that date are those of the Fidelity Advisor Limited Term Bond Fund Class I and reflect the Class I's expense ratio.

Initial offering of the **Fidelity Stock Selector Mid Cap** Retail Class took place on June 12, 2012. Returns prior to that date are those of the Fidelity Advisor Stock Selector Mid Cap Class I and reflect the Class I's expense ratio. Had the Fidelity Stock Selector Mid Cap Retail Class expense ratio been reflected, total returns would have been lower. Initial offering of the **Fidelity Floating Rate High Income** Retail Class took place on September 19, 2002. Returns prior to that date are those of the Fidelity Advisor Series I Share Class and reflect the Fidelity Advisor Series I Class expense ratio. Had the Retail Class' expense ratio been reflected, total returns would have been higher. Initial offering of the Fidelity Advantage Share Class of the **Spartan 500 Index Fund**, **Spartan Extended Market Index Fund**, **Spartan Total Market Index Fund**, and the **Spartan International Index Funds** took place on October 17, 2005. Initial offering of the **Spartan US Bond Index Fund** Fidelity Advantage Share Class took place on May 10, 2011. Returns prior to those dates are those of the Investor Class and reflect the Investors Class' expense ratio. Had the Fidelity Advantage Class' expense ratio been reflected, total returns would have been higher.

Risk Measures		
As Of 01/31/2024		
Measure	vs. MSCI ACWIxUS IMI (Net MA)	
Alpha - Annualized		-0.29
Beta		1.02
Information Ratio		-0.13
R-Squared		0.98
Annualized Tracking Error		2.27
Downside Volatility		0.46
Relative Volatility		1.03
Measure	Fund	vs. MSCI ACWIxUS IMI (Net MA)
Sharpe Ratio	-0.09	-0.07
Standard Deviation	16.92	16.37

An R-Squared value of less than 0.5 indicates that Annualized Alpha and Beta are not reliable performance statistics.

Asset Allocation

As Of 12/31/2023

Asset Class	Fund
Developed Value & Growth	61.10%
Developed Small Cap	9.38%
Emerging Markets	28.16%
Cash & Net Other Assets	1.36%
Total	100%

Additional Allocations	Fund
Futures, Options & Swaps	1.82%

Net Other Assets can include fund receivables, fund payables, and offsets to other derivative positions, as well as certain assets that do not fall into any of the Portfolio Composition categories. Depending on the extent to which the fund invests in derivatives and the number of positions that are held for future settlement, Net Other Assets can be a negative number. In addition to fund receivables and payables, Net Other Assets (when applicable) may include notional assets/liabilities of certain derivative instruments.

Morningstar Ratings		
AS OF 12/31/2023 ; Morningstar Category: Foreign Large Blend		
Overall	★★★★★	Out of 698 funds
3 Yr	★★★★★	Out of 698 funds
5 Yr	★★★★★	Out of 642 funds
10 Yr	na	na

The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics, which are based on risk-adjusted returns. Past performance is no guarantee of future results.

Additional Information

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar risk-adjusted return measure that accounts for variation in a fund monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Morningstar Rating is for the indicated share class only; other classes may have different performance characteristics. © 2009 Morningstar, Inc. All rights reserved. If applicable: *StyleMaps* estimate characteristics of a fund's equity holdings over two dimensions: market capitalization and valuation. The percentage of fund assets represented by these holdings is indicated besides each StyleMap. The position of the most recent publicly released full holdings is denoted on the StyleMap with a dot. Historical StyleMap characteristics are calculated for the shorter of either the past three years or the life of the fund, and are represented by the shading of the box(es) previously occupied by the dot.

Prior to 7/1/99, 2/1/07 and 2/1/07, Value Strategies, Trend and Growth Discovery operated under certain different investment policies and compared their performance to a different benchmark. Prior to 2/11/00, 9/1/00, 12/29/01, 10/1/04 and 12/1/07, respectively, Aggressive International, China Region, Focused Stock, International Discovery, and Mega Cap Stock operated under certain different investment policies. These funds' historical performance may not represent their current investment policies.

Prior to 10/1/06 Select IT Services, Select Consumer Discretionary, Select Industrials, Select Communications Equipment, Select Consumer Staples, and Select Materials were named Select Business Services and Outsourcing, Select Consumer Industries, Select Cyclical Industries, Select Developing Communications, Select Food and Agriculture, Select Industrial Materials, respectively. These funds and Select Utilities Growth operated under certain different investment policies and compared their performance to different secondary benchmarks prior to 10/1/06. Prior to 7/1/10 Select Environment and Alternative Energy was named Select Environmental and compared its performance to a different secondary benchmark. The funds' historical performance may not represent their current investment policies.

Definitions

Alpha-Annualized A risk-adjusted performance measure. A positive (negative) alpha indicates stronger (poorer) fund performance than predicted by the fund's level of risk measured by beta. **Annualized Tracking Error** measures how closely the fund's returns have tracked an index. The standard deviation of the monthly differences between the fund return and the index return over a 36 month rolling time horizon. **Annualized Turnover Rate** is the lesser of amounts of purchases or sales of long-term portfolio securities divided by the monthly average value of long-term securities owned by the fund. **Asset Allocation** refers to the makeup of a fund's portfolio expressed in categories such as stocks, bonds, real estate, etc., as a percentage of Net Assets. **Average Annual Total Return** A hypothetical rate of return if achieved annually would have produced the same cumulative total return if performance had been constant over the entire period. Average annual total returns smooth out variation in performance; they are not the same as actual year-by-year results. Total returns are historical and include changes in share price and reinvestment of dividends and capital gains, if any. **Beta** a measure of the volatility of a fund relative to its benchmark. A beta greater (less) than 1 is more (less) volatile than the index. **Downside Volatility** measures the volatility of a fund's returns below a minimum accepted level; calculated as the standard deviation of a fund's under-performance relative to the benchmark. **Expense Net of Waivers** reflects expenses after reimbursement by the investment adviser but prior to reductions from expense offset arrangements. 130/30 Large Cap incurs interest and dividend expenses on short positions that are not reimbursed under the expense cap; therefore, net expenses may exceed the Expense Cap **Foreign Investments** percentage of portfolio holdings in foreign investments. **Gross Expense Ratio** is the total annual class operating expense ratio from the most recent prospectus and generally is based on amounts incurred during the most recent fiscal year. **Information Ratio** measures a fund's active return (fund's average monthly return minus the benchmark's average monthly return) in relation to the volatility of its active returns. **Net Expense Ratio** is an annualized figure that reflects amounts reimbursed by Fidelity or reductions from brokerage service or other expense offset arrangements, if any, and is updated as the annual or semiannual information is available. Net Expense Ratio could be higher than the Gross Expense Ratio due to different reporting dates and fluctuations in expenses and/or asset levels.

Relative Volatility compares a fund's volatility to a benchmark. A relative volatility greater (less) than 1 means the fund's returns have been more (less) variable. **R-Squared (R²)** measures how a fund's performance correlates with a benchmark index performance and shows what portion of it can be explained by the performance of the overall market/index. R² ranges from 0, meaning no correlation, to 1, meaning performance correlation. **Return after Taxes on Distributions** are adjusted for federal income taxes associated with fund distributions but do not reflect the federal income tax impact of gains or losses recognized when fund shares are sold. Although these returns assume that an investor continued to hold shares for the purposes of reflecting the federal income tax impact of sale of fund shares, they assume that an investor sold the shares for purposes of reflecting deduction of fees and charges payable upon sale. **Return after Taxes on Distributions and Sale of Fund Shares** are adjusted for federal income taxes associated with fund distributions and reflect the federal income tax impact of gains or losses recognized when fund shares are sold. These returns reflect deductions of fees and charges payable upon a redemption of fund shares, such as sales charges or redemption fees. **Sharpe Ratio** is a measure of historical adjusted performance calculated by dividing the fund's excess returns (fund's average monthly returns minus the average monthly return of the Salomon Smith Barney 3-Month T-Bill Index) by the standard deviation of those returns. The higher the ratio, the better the fund's return per unit of risk. **Standard Deviation** measures the historical volatility of a fund. The greater the standard deviation, the greater the fund's volatility. **Top Industry Holdings** diversification of fund assets by major industry, arranged by weighting from largest to smallest positions on the dates shown.

Before investing, consider the fund's investment objectives, risks, charges, and expenses. Contact your investment professional or visit institutional.fidelity.com for a prospectus, or, if available, a summary prospectus containing this information. Read it carefully.
